# ACCESS POINT

## VASCULAR

### Our Mission:

To provide powerful Point of Care applications that empower nurses to improve patient care, drive positive outcomes and reduce the cost of vascular access.

Easy-to-use, guided data entry allows nurses to quickly create and evaluate critical data regarding their patient's vascular access device from insertion, during care and maintenance, through removal.

APV provides real-time access to a wide array of data analytics displayed in full color graphics to help spot trends, drive policy creation and compliance, and document the vascular access care continuum.

## CAPTURE

...Procedure defining data including:

- HIPAA compliant patient information
- Device selection information
- Access Site Assessments
- Procedure related metrics such as 'Time', '# of attempts', use of Ultrasound etc.
- Document with Photos
- ...And much more

## ANALYZE

...Real-time data to:

- Spot trends in performance
- Track stats and compare metrics for each user
- Evaluate current and previous lines
- Analyze the effectiveness of new products or policies
- Compare your hospital to Regional and National averages
- Print detailed reports with customizable graphics

## IMPROVE

...Vascular access nursing practice to:

- Reduce costs
- Create procedural protocols and drive compliance
- Increase patient satisfaction
- Manage and Avoid VAD complications
